

# LOAD BREAK DISCONNECTS

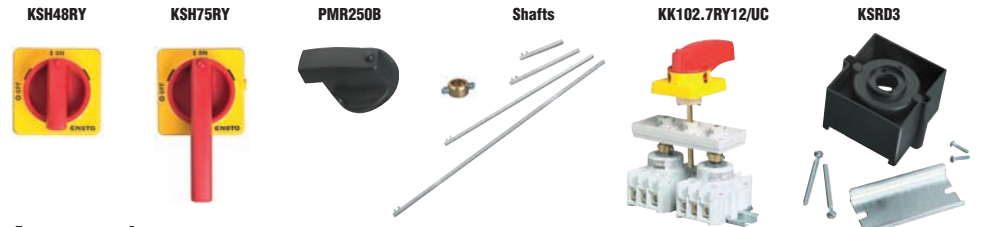

The Ensto Origin line of small industrial switches has been private-labeled by major corporations worldwide, and has demonstrated its rugged reliability in thousands of applications – with a wide variety of mounting configurations. The Ensto load break switches have the following features:

- 3 pole rotary switches, with nominal currents of 40 A to 100 A
- UL 508 certified as manual motor controllers suitable as motor disconnects.
- Direct or through-door actuation
- Wide range of accessories including handles, shafts and mounting options
- Changeover mechanism available for applications where a circuit needs to be in the “off” position while being worked on and power transferred to another circuit, or for reversing the direction of a machine.
- 35mm DIN-rail mounting or panel mounting
- Non-defeatable rotary handles rated NEMA 4, 4x and available in black or red/yellow
- 10kA @ 480V

## Enclosed Disconnects

### Features:

- UL Listed (UL 508) assemblies
- Impact resistant polycarbonate enclosure
- Halogen free, UV resistant
- Triple padlockable
- 3 pole rotary switches, with nominal currents of 40 A to 100 A
- Assemblies rated UL and NEMA Types 4, 4X, 12, 13
- Non-defeatable rotary handles

# NON-FUSIBLE DISCONNECT SWITCHES

Ferraz  
Shawmut

from

**\$93**

Ferraz Shawmut SIRCO disconnect switches are extremely durable, manually operated, non-fused disconnect switches. These heavy-duty switches are designed with the most up-to-date disconnect switch technology available. Designed to meet the UL98 standard, the SIRCO gives you a product that “makes and breaks” loaded power circuits and are suitable for “Service Entrance”. A wide array of handles are available to meet OSHA padlocking requirements, NEMA configurations, defeater options, and NFPA 79 requirements.

## Features

- Service entrance rated, UL98
- 600 VAC, 250 VDC
- Compact footprints
- Visible blade contacts up to 400 A
- Line side shrouding supplied with switch
- External or direct operation handles
- Flange operation (with side operated switches)
- Padlockable handles
- Up to 200 kA Short Circuit Rating with Fuses

## Accessories

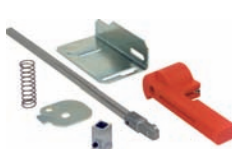

- Rotary handles and shafts (front operated models)
- Flange handles and cables (side operated models)
- Lug kits
- Terminal shroud kits
- Shorting links
- Auxiliary contact blocks

Rotary Handles

Shafts

NFPA791

## Non-Fusible, Front operated, 60 to 400A

Part Number	Description	Price
SCV60U	Front-operated disconnect, non-fusible, 3-pole, visible blade contacts, integral lugs, 600V, 60A	<b>\$93</b>

# FUSIBLE DISCONNECT SWITCHES

Ferraz  
Shawmut

from  
**\$108**

Ferraz Shawmut FUSERBLOC disconnect switches are extremely durable, manually operated, fusible disconnect switches. The switches employ double break contacts per pole that ensure complete isolation of the fuse when the switch is in the OFF position. With safety in mind, all FUSERBLOC switches are supplied with fuse covers and line side shrouding as a standard feature. These switches provide the ultimate in short circuit protection when used with Ferraz Shawmut's Class J or L fuses. These heavy-duty switches are designed with the most up-to-date disconnect fuse and switch technology available. Designed to meet the UL98 or UL489 standard, the FUSERBLOC gives you the product that "makes and breaks" power circuits under load.

## Features

- 600 VAC, 250VDC
- Up to 200 kA Short Circuit current Rating (SCCR) with Class J, or L Fuses
- Double break contacts per pole up to 800 A
- Touch safe fuse covers/ line shrouding standard
- Service Entrance Rated, UL98
- Test positions available up to 400 A

## Applications

- Service entrance or main panel disconnects up to 600VAC, 800A
- "Make and Break" power circuit on load
- Fusible isolation switches
- NFPA 79 solutions

## Recommended fuse usage

- FBJ use with AJT, A4J, HSJ
- FBL use with A4BQ, A4BY, A4BT

## Accessories

- Rotary handles and shafts (front operated models)
- Flange handles and cables (side operated models)
- Lug kits
- Terminal shroud kits
- Shorting links
- Auxiliary contact blocks

AC5	Side mount auxiliary contact block, 1 N.O / 1 N.C.	<b>\$42</b>
AC6	Side mount auxiliary contact block, 2 N.O / 2 N.C.	<b>\$42</b>

## Fused Disconnect General Specifications

Part Number	FBJ60U FBJ60SO	FBJ100U FBJ100SO	FBJ200U FBJ200SO	FBJ400U FBJ400SO	FBJ600U FBJ600SO	FBL800U
Rating	60A	100A	200A	400A	600A	800A
Fuse type	J	J	J	J	J	L
Max fuse rating (A)	60	100	200	400	600	800
Operating voltage	600V	600V	600V	600V	600V	600V
UL Rating Three Phase (HP/FLA)	208 VAC	15 / 48.5	25 / 78.5	50 / 150	100 / 286	-
	240 VAC	15 / 42	30 / 80	60 / 154	125 / 312	200 / 480
	480 VAC	30 / 40	60 / 77	125 / 156	250 / 302	400 / 477
	600 VAC	50 / 52	75 / 77	150 / 144	350 / 336	500 / 590
	125 VDC (1)	3 / 25	7.5 / 58	15 / 112	20 / 148	-
250 VDC (2)	10 / 38	20 / 38	40 / 140(1)	50 / 173(1)	-	-
Short circuit rating with fuses (SCCR)	200kA	200kA	200kA	200kA	200kA	200kA
Dimensions (HxWxD) (3)	5.87"x6.72"x5.62"	7.19"x8.26"x5.63"	8.13"x9.44"x6"	14.31"x11.93"x5.56"	11.86"x14.31"x11.42"	11.86"x14.31"x11.42"
Terminal lugs kit	Integral	Optional	Optional	Optional	Optional	Optional
Wire range AWG (# of wire holes per lug)	#3-#10 (1)	2 / 0-#14 (1)	3 / 0-#6 (1)	600 kcmil-#2 (1)	600 kcmil-#2 (2)	600 kcmil-#2 (2)

(1) 2 pole in series

(2) 3 pole in series

(3) Dimensions are for 3 pole, front operated switches
